

Title: Software Developer

Reports To: CTO

Salary Range: DOE

Description:

TriActive is an Austin based SaaS (Software-as-a-Service) company focused on hosted systems management solutions for small and mid-size companies. TriActive does for systems management what Salesforce.com does for CRM. TriActive has been in business since 1997.

Preferred Experience:

TriActive has an immediate opportunity for a Software Developer with experience in Microsoft Windows development. Duties will include developing system management modules for the Windows platform to work with TriActive's patented MicroAgent technology. This is available as a full-time position.

Requirements:

Candidates should have at least three (2) years experience in Microsoft Windows development and should be familiar with developing in C/C++ using the Win32 API using Microsoft Visual Studio.

Familiarity with any of the following tools and technologies a plus: Active Directory, MSI, Intel vPro/AMT, Unicode, UTF-8, XML, RDBMS (Oracle, Postgres), OpenSSL. Experience with Java, Mac OSX development, and Linux also a plus. Experience with Agile development methodologies a plus.

Ideally the candidate will have a BS in Computer Science, Computer Engineering, MIS, a related field, or equivalent work experience.

TriActive is an Equal Opportunity Employer. TriActive's benefits include health, dental, long term disability, and vision insurance, and 401k, Section 125 Flexible Spending, FTO, and Health Advocate service.
